

SECOND GRADE LITERACY CURRICULUM AT A GLANCE

Students will move forward to become more skilled in literacy practices and thinking. We will continue to use the Foundations phonics program to develop phonemic awareness and decoding skills. Children will explore different literature genres throughout the year as well as strengthen their comprehension skills. In oral and written language, students will progress from using simple sentences to using more complex sentences incorporating correct grammatical conventions. Whole and small group instruction, centers, and technology will be used in the classroom. As the year continues, they will develop their ability to express themselves in the world in which they live.
